John F. Clemens

Mr. Clemens received his B.S. in Electrical Engineering in January 1948 from Notre Dame University, graduating magna cum laude. He also attended the Electrical Engineering Schools of the University of Florida, University of Pittsburgh and Pennsylvania State College.

Mr. Clemens served in the Army during the war, and from 1945 to 1946 was assigned to the Research and Development Service of the Chief of Ordnance at John Hopkins Applied Physics Laboratory. In 1947 he was employed by the Philco Corporation in its Radar Laboratories. He has written numerous technical articles for radio publications, and holds a first-class radio telephone, second-class radio telegraph and amateur operator's license. He was responsible for the design and installation of a carrier-current broadcast station at Notre Dame, Indiana.

In February 1948, Mr. Clemens joined Electronics Research, Inc. where he has been engaged in the design of transmitting and receiving r-f circuits for the VHF and UHF regions.
